How to make a digital slide show

- Open program
- New project—File—New—Choose Name
- Open folder with photos
- Select photos
- Rearrange photos into order using drag and drop
- Apply time for each slide (or leave at default settings)
- Apply effect for each slide (or leave at default settings)
- Add Music File from project options –Check play background music box—Add—choose music file from Music folder
- P2exe only plays certain music files. Will not play direct from CD's. Open windows media player—Copy from CD—Check track required—Copy Music

- Save As....
- Repeat for as many photos required
- Enables next photo to be placed exactly on top of last
- Use layers to turn off photos not required
- Window—Layers

Other Effects

- Colour to Mono transitions. Use Image—Mode to prepare mono and colour images of same photo
- Use filters to change images
-
